

## SOFTWARE ENGINEER

### Summary

- Collaborated with peers on several projects, demonstrating strong teamwork, communication, and project management skills in a collaborative coding environment.
- Solid foundation in key programming languages such as Java and HTML with some experience in C and CSS.
- Proficiency with Git/GitHub for version control and project management.

### Relevant Experience

#### Jack David Gordon Elementary School Technology Education Volunteer

June 2019 - August 2019

- Developed and delivered engaging presentations on the importance of technology to elementary school students, fostering an early interest in STEM fields.
- Facilitated hands-on activities and workshops to enhance students' tech literacy, promoting practical understanding and application of technological concepts.
- Collaborated with teachers to integrate technology-focused lessons into the curriculum, contributing to a comprehensive and interactive learning experience for students.

### Skills

- Proficient in Java and HTML programming.
- Skills in C and CSS.
- Strong teamwork and communication
- Familiarity with software development tools.
- Problem-solving and analytical skills
- Understanding of Git/GitHub

### Education

#### Florida International University • Miami, FL B.S. in Computer Science

Class of August 2026

- Actively participated in coding competitions and hackathons, showcasing problem-solving skills and a passion for hands-on software development.
- Collaborated with classmates on class projects, honing teamwork and communication skills in a coding environment.

#### Terra Environmental Research Institute • Miami, FL Highschool

Class of July 2022

- Applied coding skills to program VEX robots, showcasing a practical understanding of software engineering principles in a hands-on environment.
- Collaborated on multidisciplinary engineering projects annually, enhancing teamwork, communication, and project management skills.
